

Tear-free Baby Medicine Dispenser

InfantMed has a soft medical silicone extension on the tip of the syringe cavity that extends up to the tip of the nipple to ensure that the medicine does not mix with the milk. This extension is so soft that baby does not feel it is in baby's mouth whilst drinking on the nipple. Medicine is slowly dispensed through a standard 5ml syringe. The medicine goes right to the tip of the nipple that is in the baby's mouth when the baby is about to swallow, thus, baby drinks medicine mixed with a mouth full of milk.

Compatible with your baby's preferred nipple

Material Description:
All materials are BPA FREE!
BOTTLE:
100% Polypropylene
SEAL:
100% Silicone
CLEANING INSTRUCTIONS:
Wash and sterilize bottle before each use.
WARNING AND SAFETY PRECAUTIONS:
Store in a cool, dry place out of reach of children. Choking hazard.
Only use medicine as directed by your medical practitioner.
Use only as instructed. Do not let child drink unsupervised.
See terms and conditions.

InfantMed is a newly designed baby medication bottle, which delivers your baby's medicine undetected and accurately whilst drinking milk. InfantMed was specifically designed to be compatible with the leading brand nipples on the market to ensure that your baby's preferred nipple can be used.

InfantMed is a must-have for every mother or caregiver to ensure that baby takes all of its medicine without the tears and trauma.

InfantMed is BPA free and is safe to use in a microwave. The bottle consists of 4 unscrewing parts for easy cleaning and sterilizing.
